

Hotel Net Service launches its own travelforum and hotelrating system.

Hotel Net Service

(worldwide online reservations portal) is adding new features to become a reference guide in travel: a forum with traveller's experiences and a hotel rating system.

Hotel Net Service (www.hotelnetservice.com) has been on the virtual reservation market for 7 years now and has developed from an "On-Request" system, to a fully fledged online reservation system, with meanwhile more than 3000 properties listed in over 40 countries. Currently Hotel Net Service is launching its own travelforum (www.hotelnetservice.com/forum/) while the hotelrating system will be launched shortly. Hotel Net Service customers will not only be able to make an online reservation in Rome, Florence, Venice, London, Paris and many more worldwide destinations, but also use Hotel Net Service as a reference point for their next travels by reading fellow traveller's experiences. Joining Hotel Net Service of course is still free, both for travellers as for new properties, and both travellers and accommodations can use a tailor-made forum. We accept and feature all types of accommodation: hotels, bed and breakfasts, apartments etc.
